

## CAMPUS SAFETY DEMANDS NEW TOOLS

Our Mobile Suite  
is yet another  
way ReconaSense  
proactively extends  
campus safety:

**WatchCommander:** Emergency lockdown is at your fingertips. Literally. Our wearable iWatch application arms staff and SRO's to quickly and easily initiate lockdown if an attack occurs. Experts often say that faster lockdowns would mitigate damages.

**EmergenSEE:** Quickly share surveillance with first-responders and law enforcement in critical situations to accelerate and improve response decisions, while protecting student privacy during daily operations.

**See & Say:** Staff can easily collect and log suspicious activity by mobile monitoring of environments for early warnings.

**MobileMuster:** Students can provide their status and location during an incident, when every second matters.
